BITBOOSTER BITCOIN MINING BOOSTER

Traditional Mining

Traditional miners require large investments to set up mining machines and compete with global mining farms

VS

BitBooster Mining

BitHarvest Miners do not need to set up mining machines; they share computational power with mining farms through BIT Booster. By utilizing the accelerated speed of the AI BitHash system, miners earn additional revenue.

✓ No need for high-cost purchases of mining machines.

OUR ROADMAP

01 PHASE

Presale

BitHarvest will start the presale of BTH in early of 2024 for BitBooster activation and burning.

The presale will last for multiple cycles, with the price of BTH increasing in each cycle.

OTC

After the BTH presale, BitHarvest will open an OTC trading market for BTH, facilitating more consensus participants to prepare BTH in advance for future BitBooster activation.

02 PHASE

BITBOOSTER

After the presale, BitHarvest will launch BitBooster, a Bitcoin mining incentive seamlessly integrated into partnered mining facilities and BitHarvest centers. Users can activate it through our App by burning BTH tokens, initiating their profit-generation journey.

03 PHASE

04 PHASE

Application

After the release of BitBooster devices, BitHarvest will gradually launch applications such as **HAVI GAME, BIT TRADE, BITWALLET, and BTH Network**. Stay tuned.

Note

Based on an output of 0.00000073 ₿ per TH, the Booster is projected to generate approximately 0.003066 ₿ per month, assuming a 200% acceleration rate for predictive purposes. This estimate is calculated with a Bitcoin price of \$70,000 and should be used for reference only. It does not account for potential impacts from changes in mining difficulty or equipment efficiency, which could affect earnings. Increased difficulty and technological advancements may impact operational efficiency. Actual earnings may vary, and investors are advised to conduct thorough risk assessments before making decisions.
